How to read a Schedule to the Regulations

The key below explains the components of a typical Schedule (the example shown is for the purposes of illustration only and is not a real course).

			EFTS		/// /
PHYS 399	Physics Research <i>Note: Limited entry. See limitation of entry regulations.</i>	14	0.1167	S1	P: MATH 105 C: PHYS 398 R: ASTR 392 RP: PHYS 201 EQ: ASTR 392

The course code consists of a four-letter subject code (eg, PHYS for Physics) and a three digit number, the first number of which indicates the level of the course.

The course title (eg, Physics Research) provides a quick guide to the area covered by the course.

The notes contain any other important information which relates to the course.

This is the number of points that will be credited to a student's degree/diploma/certificate if they pass the course. Only the schedules listing undergraduate courses indicate points values.

EFTS means 'equivalent full-time student'. This is the Ministry of Education's basic unit of funding to the University. The EFTS value of a course is multiplied by the appropriate fee band to determine the fees for a course. The EFTS value can also be used to a guide to workload. Only the schedules listing postgraduate courses indicate EFTS values.

The course occurrence code indicates the semester(s) the course is being offered in, eg, S1 = Semester 1.
Note: SU2 indicates a November 2007 course start date. See page 446 for a full list of semester indicators and course dates.

Prerequisites are the course(s) a student needs to pass before they can enrol in a course.

-

Co-requisites are courses a student must either have already passed, or be concurrently enrolled in, to enrol
